SET BACK FOR THE LEVEL-SN TICHER

The levee-grabbing propensities; of the gen-tleman from Dundee have received a set back in the action of the senate on his levee bill. Amenuments to the bill were proposed an lear-ried, calefly through the efforts of Mr. Sunon, which will have the effect of spolang it as a scheme of speculation for the projector. One of these provides that for the levee, if taken for railroad purposes, there shall first be paid for it such sum as may be adjudged by a court of counterly installed. ee-grabher is to pay for the ground what it is te le now no probability that at will go matcher Mr Simon has opposed the "steel" with great earnessness and skill, and to him the credit of checking it is aimed wholly due. THE POTING FOR SENATCH.

The majority of the republicans of the legisladay to day, evidently under the fee any to day, evalently under the feeling that the minority will come to him or ought to come to him, while the members of the muority con-tinge to scatter their votes, untable to agree upon any one. The voting of the minority would inathong mean for paracinal cammaco, insight than positive opposition to Hirsch. Ordinarily, the expression of the majority in such a case should be allowed to have weight. Associated political action, through which parties are pos-sible, cannot be maintained unless some defer-ence is paid to the numbers which constitute majorities. There may be and must be excepthat of the last senatorial election in this state but the personal character of the car didate who had the majority on that excession was the insuperable distacle to his acceptance by the minority, and instances like that are very oy the minority, and instances like that are very rare. The ORPONIAN has no candidate, it is not pleading for the election of Hirsch, and it is saying no more than it would say were any other reputable man occupying the position he holds. The point it wishes to sunprinsize is this, namely, that the idea that a chinor ty of the representatives of the next set. ives of a party are always right in opposing the candidate whom the majority may pronounce for is not good and valid that asso-ciated political action, under the name of party, cannot be maintained upon that principle, and cannot be maintained upon that principle, and that the justifiable and necessary except on made at the last session cannot safely become the settled usage of party, or a precedent for cases where no such objections to a candidate can be presented as were urged then. Hirschiectanily has warm friends in the legislature, else he would not receive the true that is cost for him would not receive the true that is cost for him. would not receive the vote that is cast for him from any to day should be not get except for nim elect there will undoubtedly be an effort to con-centrate on some one else. Then Hirsch's friends may deem themselves fully at liberty to prevent a result. The majority principle is the basis of effective pclitted action, and it is safe to yield to it except in the se unisual cases where a limit date scharacter, personal, political or o helal, or all together, make resistance a plain and posi

THE SAOR BLOCK 4DE

The impression seems to prevail in this state, and Navigation Company between Portland and The Dalles, which has recently been obstructed by snow, is more exposed by the necessities of its location to snow blockades than it netually is In the first place, it should be remembered that deep snows are not common on this portion the company sine. The recent blockade is the first and only one that has occurred since the road was built. In the second place, I curred between the thirte first and thirty-fifth mile-posts east of Portland. It was on this por-tion of the road, near the Mulmomah falls, be-tween the thirty first and thirty-second mile-posts, that the force of men under Mr. Hausen worked eight days, and between the thirty-third and thirty-fifth mile-posts that Mr. Buckley's ordinary snow plough, occurred at Shell Rock Point and Mitchell's Point on the upper river These were difficult only because of the sharp curries on which the points are passed by the read, which make it dangerous to run a snow plough with sufficient speed to clear away the snow The limits of exposure to drifting snow at these points however are outless areal and

at these points, however, are quite small, and the difficulty may be entirely overcome by stralgulening the track or by protecting it for a short distance by she is. Between the thirty-first and the thirty-fifth mile tests the difficuty was owing to the fact that the road is built close to the base of a bluff about 700 feet high, over which the enow was shown from the plateau above. The difficulty there can be wholly avoided by moving the read about thirty feet away from the bluff. Such a change in its location is entirely practicable, and it can be made without great expense. The situation of the road, it will thus be seen, is very different from what it would be if it ran through a narrow canyon, where there would be no chance to escape snow drifts by an easy change in its location.

the line to serious impediment from snow. All the test of the track through the Cascades is so situated as not to be subject to any drifting of nary means, and be kept open for the regular passage of trains. The company will doubtless take measures to project these exposed portions of its line against future blockpass, before another winter. The limits of the difficulty are so small, and now so clearly understood, that it is safe to say that this road will never again be blockeded by snew.

I ALCED INSTRANCE POLICIES.

The threat implied in the resolution recently adopted by the compact association of the north-west may have the effect to prevent the passage of the valued policy Fill now before the legisla-ture, but it cannot be supposed that the justice of the principle hyvol ed in that measure will be in any way affected by any action the fire under-writer mes table. seen the insurers awards them, will not be apt to of pose a "valued roboy" law Accidental instances of over insurance on stocks of merchandise may and do occur, be-cause the insurers are to some extent depend-ant upon the representations of the applicants, but there can be no excuse for the over-akuation it over-insurance of a but ting, and the pretection claimed by the fire underwriters in such classe is simply a protection against the result of their own negligence or greed of pre-

The "eports now coming almost daily of fighting telween the Brit sh troops and Arabs read like t chapter from Kinglake's "History of the Crimean War" Everywhere British blood and British braun is victorious against overwhelm-British brain is victorious against overwhelming odds, and whether sympathizing with the modies of the English government in the present campaign or not, one cannot refrain from admiring the sturdy fellows who are pouring out they I life-t lood, in the deserts of Soudru Braye to desperation when called upon to fight, they grow their very souls into it, determined to conquer or due. It is an unpleasant thought, but cannot be repressed, that the present government is sacrificing far too many of the brayest and best to maintain a policy entered upon with and best to maintain a policy entered upon with best sarcy, and now clung to in a vain hope that the title of affairs may create a revision of pop-ular feeling, and with stone's motives be vinda-

Ck-eland's cabinet has been decided upon at last, a New York paper having "given the snap away". The south is to be rewarded for its steady democratic majorities by the attorne generaliship and the portfolio of the interney generaliship and the portfolio of the interner department. The former will be given to Senator tariam of Arkanesa, while ex-senator Henry to Bayus of West Vargania will probably be tendered, the latter. It is also stated that W.F. Vies of Wiscoman will be provided for, although his particular pigeon-hole has not been decided on the secretary of state's portfolio goes to Thurman of Ohio, and an as yet undescribed gentlem to from New York will hold the door of the treasury open while the surplus now in its saults pours out. The other members of the calline are selected, but their names not made public for obvious reasing.

The juxted battle at Burn, between tremeral harle's forces and the Arabs, has a ided mother to the hurels the English army has gamed in the present Egyptian campugu, and with the usual expenditure of valuable tives, on the occas on General Laria himself, Lie itenant Chonel Er e of the Staffordshire regiment, and Major (every of the relebrated "Plack Witch" High harders, were among the killed. The Arabs were in all in numbers and in a strong position, let those who escaped did so by charging desperate y through the British lines, and were very lew in number.

FIGHTING IN EGYPT. The Arabs, against whom the British forces

nro contending in kgypt, are as galingt a race as the Zulus of South Africa, and in close quarters are nyore than a match, man for man, with their spears for the European soldiers with the improved arms of modern warfs. They are of the same blood as the splendid Mameluke cavairy, that under Murad Be, charged the squares of Napoleon Bonnaparte, at the lattle of he pyramids, in 1704, only to perish under the rolling hee of the army of Italy It was a greater exploit to repulse the Manietukes than for General Sfewart, to repulse the deskit Araba, because the weapons of modern wanters are more destructive against barbarian herseinen than these of Aspoleou But the English army of to day, while better armed, is not so fine and gd iant a body of soldiers as the armies with which three, code and Well sley beforekit the best men of India in lattice against common clids. The reason is that the military service of Lugland is now shunned and despised by the best men, and the army is made up from a lower, feebler, more degraded and depraved class than former y In his recent report to the secretary of wir, freneral Sheridan sald. "If improvements of every call the continue to be as rapid as during the roat of them of them to the continue of the continue the past fifteen of twenty party, and a good magazine rifle be finally attained, lattles will become so destructive to human life that neither side in war will be able to stand up before the In battles between the armies of Europe, or of this country, this result may forto the ruder nations the result is less likely to follow, since the English soldler armed with the Martini repeating rifle cannot beep the Arab from coming to close marters. Several Canadian officers, fired with patriotic

ardor, offered to raise a regiment of treops for the Soudan campaign a few days ago, but the home government has cruelly crushed their aspurations by declining such services, and tender ng them the privilege of doing garrison duty in he mother country. The Canadianescill also

peopic are inquiring if the bill passed by the egislature the other day, abolishing certain regenerary one other day, abolishing certain witness fees in Multnomsh county, Includee all course or only justices' courts. It includes all courts. Following is the full text of that section of the bill which abolistes the fees. "In all criminal actions and precedings witnesses residing within two miles of the place of trail, or the place where they are required to appear and criminal actions and proceedings witnesses residing within two miles of the place of trial, or the place where they are required to appear and teatify, shall not be entitled to receive either witness fees or mileage." In all civil cases, or where witnesses come from a distance of more than two miles, the fees are fixed at \$2 a day in criats of record, and \$1 50 in justices' courts ho good cittien will object to the above bill, which is certainly calculated to reduce the countr's expenses and prevent the making of a large number of silty, needless complaints. Every law abiding citizen of the community owes to himself, as well as to his neighbors, to de every thing that hes in his power for the preservation of law and order and the suppression and punishment of vice and cruns. As it would be his ditty to prevent a crime if he saw it about to be committed, so it his duty to furnish any and all information he may possess that would tend to pinish the guilty or project the innecent and it would be the measures prompilings of parel mony that would cause any man to object to giving such testimony as he may possess without the promise of a reward.

reached in the state circuit court, and the case of the state vs. Fitzgerald came up for trial yesterday before Judge Taylor. Before leaving for Astoria Judge Smith had set three of these whisky to wrestle through one. It was the case of Fitzgerald, who kept a saloon at 235 Front street, corner of Main, and who, on the 18th day of April, 1888 sold a gill of whisky to one J. Davis for 10 cents. Nearly two years have passed, and still we cast our weary, longing gaze ofter 118 whisky cases, which remain for tight. The case for the city was conducted by tity Attorner whisky cases, which remain for tight. The case for the city was conducted by City Attorney Tanner, and the defense by Cot, Drake, who has conducted—or, more properly speaking, held back—cases for the whisky men ever since they rebelled against paying their license. There were no new points raised in the case. Drake raised all the old ones which he has been raising, for two years, and which have been twice settled by the expression of the case of the case of the case of the case. years, and which have been twice sattled by this supreme court. It makes one tired just to think of them A new feature in this case was introduced by H Schneider, who swore that Fitzger aid's write once said that she owned the saloon of her husband. This complicated matters, and the jury retired at 5 P M for deliberation. At a o'clock, when they went to supper, they had not agreed on a verdict.

Loss on building, furniture, books, papers, maps, etc. is about \$175 no insurance. An important fact in connection with the fire company stuck out very plainly at this fire, vir, the remote distance at which certain officers reside from the engine house, causing their non-attendance in this case and in any case rendering promptices impossible. The first assistant resides out toward the eastern confides of the city, and the second assistant at Salem. Whatever may be thought of the former first assistant resides out toward the eastern confines of the city, and the second assistant at Salem. Whatever may be thought of the former residence, it cannot be question at that Salem is a little too remois for an officer to reside. The responsibility thus wholly devolves upon the foreman, whose duly is to conduct the operations of the engine, and the hose is left to indiscriminate management.

work for a prohibitory clause in the new constitution, should such be decided upon. Several hundred dollars was speedly threed towards expenses in lecturing and petitioning time agislature for the prohibitory amendment. Thanks were tendered to ranzoed and steambout companies for reduced fares, the M. E. chirch ampostar for the use of the church, and citzghs, for their most generous and hospitable treatment of all the delegates. The next alliance will meet at largence try. To-night the ff. E. church was crowded, an enhantstee budden meeting instending to music and stirring space as by Revs. Lloyd and Stuble of Kansas, Dr. Ly the Hund of Portland, J. W. Wobb of California, Rev. M. J. Rugg of Salem, and Dr. Huses of Portland. Liberal collections were raised for temperative work. Everybody attending the alliance was arlow with enthusiasm for temperative and prohibition, St. John's name even eliciting warm cheers. Adjourned fill 9 A [M. Washineres Terretteres]
